510k clearance letter for the IR1DE1-1 Probe Cover-Free Thermometer

Dear Susan,

Thanks for the good news about the probecover-free IR thermometer.

Knowing this was not an easy approval, as both, disinfection and biocompatibility issues were major concerns this time, I'd like to forward you our thanks for this great success.

Time from submission to grant was **less than 3 weeks** in this case!

Thanks also to the team who supported you: Well done!!

Best regards
Gerhard.
